Elastomers and pump technology, *James DeMello*	Dec.	37
First look at Pactra's water soluble spray paint, *Michael L. SanGiovanni*	Sept.	16
Handling, toxicology and other physical properties of hydrocarbons, *George F. Ford*	Mar.	41
Macrospherical powders in aerosol antiperspirant systems, *Andrew M. Rubino, Arthur H. Siciliano, John J. Margres*	Nov.	22
Pendulum swings, The, *Robert Shiels* (glass bottles)	June	33
Problems of developing formulations of insecticidal aerosol dispensers, *V.M. Tsetlin*	Oct.	46
Seaquists's new AquaMist 'homogenizes' propellant and product	May	33
Sunray shows fluidic level control	Sept.	32
Vapor tap valves—A somewhat review, *Paul A. Sanders*	Oct.	38
With N.Y. Bronze's new paint actuator, spray directionality is Right on the Button . . .	May	36

INDUSTRY STATISTICS	Month	Page
British production sets record in 1977, *Valerie Kinglake*	July	20
Department of Commerce predicts Cosmetic sales will grow 8%; prices to rise moderately in 1978	Feb.	40
International Aerosol Association issues 1977 filling estimates— World Aerosol Statistics—1977	Dec.	36
Momentum '78—Personal products hardest hit in '77; should rise in '78, *Robert Jacobsen*	July	16

INTERNATIONAL SCENE	Month	Page
Aerosol marketing in Czechoslovakia, *Valerie Kinglake*	Jan.	32
Aerosol-Service Ltd. celebrates 25th anniversary	Aug.	22
British production sets record in 1977, *Valerie Kinglake*	July	20
Cosmetic and toiletries recover, *Valerie Kinglake*	May	38
French publication 'Que Choiser' follows consumerist line, *Valerie Kinglake*	Feb.	48
International Aerosol Association issues 1977 filling estimates— World Aerosol Statistics—1977	Dec.	36
Metal Box's new facility at Sutton-in-Ashfield	June	40
Method for testing aerosol packs, *Valerie Kinglake*	Aug.	24
Metric conversion in Canada—An update, *M.R. Earle*	Nov.	27
Outlook for personal products in Europe, *Valerie Kinglake*	Apr.	18
Quality Control: good manufacturing practices in batch process control, *David Plum*	Nov.	28
Toiletries and cosmetics doing better in 1978, *Valerie Kinglake*	Dec.	35
U.K. Associations, Safety and Legislation, *Valerie Kinglake*	Oct.	41

MARKETING	Month	Page
Aerosols—and consumer safety	Aug.	16
Air fresheners—a durable market category, *Sidney Kaplan*	Feb.	25
An interview with: Norda's Luis Christie and Grace Brady, *Michael L. SanGiovanni*	Dec.	50
Armour-Dial redesigns, reformulates antiperspirant line	May	54
At La Maur: A matter of Style *Michael L. SanGiovanni*	Jan.	22
Cosmetic sales will grow 8%; prices to rise moderately in 1978 says Commerce Department	Feb.	40
Domestic aerosol growth—historical and projected & Use of hydrocarbons as aerosol propellants, *George H. Brock*	Dec.	42
First look at Pactra's water soluble spray paint, *Michael L. SanGiovanni*	Sept.	16
Interview with Alberto-Culver's Wayne D. Frankhauser, *Michael L. SanGiovanni*	June	28

MARKETING, Continued	Month	Page
Holiday introductions: Christmas gift selections	Nov.	38
Instant worm has 60 million unit potential, *Michael L. SanGiovanni*	Aug.	26
Marketing committee looks for funds to continue P.R. program	July	14
Outlook for personal products in Europe, *Valerie Kinglake*	Apr.	18
Toiletries and cosmetics doing better, in 1978, *Valerie Kinglake*	Dec.	35
AIDS in Chicago; hydrocarbons from producer to filler	May	41
Chemical buyers and sellers (SACI) discuss TSCA, *Michael L. SanGiovanni*	Apr.	28
CSMA's Speakers stress governmental involvement	Jan.	26
CTFA, Governmental impact on industry	Apr.	24
CTFA's 59th annual scientific conference preview	Aug.	25
Eiermann on cosmetic labeling regulations; SCC annual meeting	Jan.	37

REGULATORY	Month	Page
Chemical buyers and sellers (SACI) discuss TSCA, *Michael L. SanGiovanni*	Apr.	28
CSMA: Speakers stress governmental involvement, *Margaret Hundley*	Jan.	26
CTFA's annual meeting: governmental impact on industry	Apr.	24
CTFA takes a look at good manufacturing practices	Sept.	20
Eiermann on cosmetic labeling regulations (SCC annual meeting)	Jan.	37
Legislation—how harmful is too much?	Feb.	28
Manufacturing Chemists discuss Toxic Substances Control Act, *Paul Geiger*	Jan.	31
Packaging Materials control *Willard Morton*	Oct.	43
U.K. associations safety and legislation, *Valerie Kinglake*	Oct.	41

RESEARCH AND DEVELOPMENT	Month	Page
Aerosol dispensed polymeric foam pads and dressings, *Kevin Claffey*	Apr.	21
Aqueous-alcoholic hydrocarbon propelled aerosol hairsprays, *F.A. Nowak, F.T. Koehler and A.L. Micchelli*	Sept.	24
Controlled release propellant reservoirs, a means for getting more and better foam, *John Thompson, Fred Peacock*	Nov.	14
Good manufacturing practices in batch process control, *David Plum*	Nov.	28
Fairleigh Dickinson offers BS in toxicology	June	42
Macrospherical powders in aerosol antiperspirant systems, *Andrew M. Rubino, Arthur H. Siciliano, John J. Margres*	Nov.	22
Methods for testing aerosol packs, *Valerie Kinglake*	Aug.	24
Problems of developing formulations of insecticidal aerosol dispensers, *V.M. Tsetlin*	Oct.	46

Look to Stepan for the newest in hair spray resins...

Stepanhold R-1

This is a unique terpolymer resin, offering an unusual selection and combination of monomers and polymerization techniques for hair sprays and wave set formulations. And, it is specially developed for excellent stability in hydrocarbon and hydrocarbon-water propellant systems.

Among the outstanding characteristics imparted to the hair are: superior holding power with minimum stiffening, high lustre with no yellowing or darkening, and ease of combing. It is also a conditioning agent, offers less tackiness in high humidity and is non-flaking.

For formulating, Stepanhold R-1 offers both complete alcohol solubility and a complete range of water solubility. It provides an extremely hard film and a clear film at low percentage of neutralization. Its low acid number reduces corosion.

Write or call for our technical bulletin.
Stepan Chemical Company
Surfactant Department
Edens & Winnetka
Northfield, IL 60093

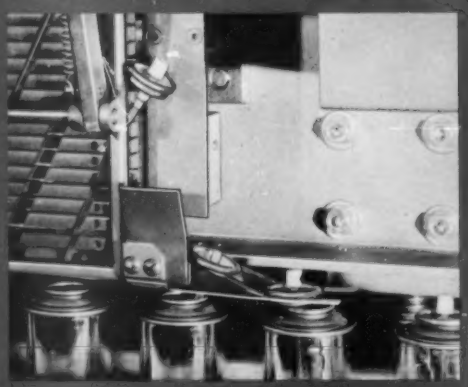
Stepan

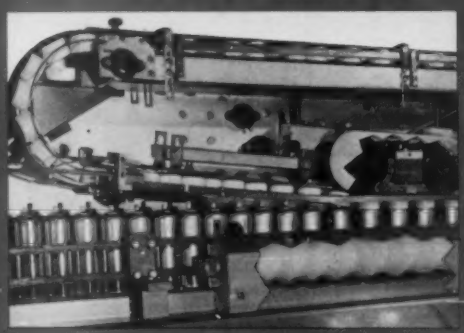
Cut down your production costs with these two time-saving KP systems . . .

VALVE PLACER



Automatically unscrambles, places and seats aerosol valves for all standard CSMA aerosol can sizes. Production rates from 50-360 CPM.

AEROSOL OVERCAPPER



Automatically unscrambles, places and seats snap-on overcaps designed for standard CSMA can diameters. Production rates from 60-360 CPM.
